

BASK 2015

Written and edited by Ben Zhang, Alston Boyd, Sean McBride, Kai Smith, and Eric Xu, with assistance from Charlie Dees, Jialin Ding, and Mohan Malhotra

Packet 1**Tossups**

1. The title character of this play takes it upon himself to “drive pollution from this land” after a scene in which a procession of citizens offers wool-wrapped sticks to stop a plague. This play is followed by one in which the title character dies “at Colonus.” An oracle in this play reveals that a plague will only stop once the murderer of (*) Laius is banished. This play ends with Creon offering the title character shelter after Jocasta hangs herself, causing the protagonist to use the pins from her dress to put out his own eyes. For 10 points, name this Sophocles tragedy, in which the title character kills his father and marries his mother.

ANSWER: Oedipus Rex [or Oedipus the King]

<AB>

2. In this opera, the only aria in a minor key is Barbarina’s “L’ho perduta.” In the duet “Cinque-dieci-venti-trenta,” two characters in this opera measure the dimensions of a bed. The music teacher Basilio mocks a man in this opera who plans to run off to the military before being chastised in the aria “Non Più Andrai.” This opera features the antics of a page named (*) Cherubino and is based on a sequel to Pierre Beaumarchais’s play *The Barber of Seville*. For 10 points, name this Mozart opera featuring Susanna, Rosina, and Count Almaviva, which is set during the preparations for a wedding.

ANSWER: The Marriage of Figaro [or Le nozze di Figaro]

<KS>

3. This astronomical body contains zircon deposits that show evidence of the late heavy bombardment. The THEMIS mission studied this body’s magnetosphere. This body experienced a Huronian glaciation that may have been caused by the Great Oxygenation Event. A collision with (*) Theia may have resulted in the creation of this planet’s only satellite. This planet has an axial tilt of roughly 23.5 degrees, which is the reason why it has its four seasons. For 10 points, name this subject of the *Pale Blue Dot* photograph, which is the third planet from the sun.

ANSWER: Earth

<SAM>

4. Eleanor Roosevelt feuded with the last leader of this organization, Carmine de Sapio. After this organization shut off the gaslights to silence their opposition, a group that opposed this organization started meeting under matchlight and became known as the locofocos. To gain power as a sachem of this society, “Honest” John Kelly aided Samuel Tilden in fighting this organization’s (*) corruption. Thomas Nast depicted this organization as a tiger and depicted one of its leaders with his head replaced by a money bag. For 10 points, name this Democratic political machine based in New York that was once led by Boss Tweed.

ANSWER: Tammany Hall [or the Society of St. Tammany]

<AB>

5. This man told pro-Palestinian hecklers to “Shut up!” at a town hall meeting in August 2014. Diane Rehm incorrectly asserted that this man had dual citizenship with Israel on her radio show. Marissa Johnson was booed during a moment of silence for Michael Brown after forcing her way on stage when this man was giving a speech in Seattle. This man's campaigns discourage the use of money from (*) Super PACs. This

former mayor of Burlington is the only independent senator. For 10 points, name this democratic socialist from Vermont, who is currently running for the Democratic presidential nomination.

ANSWER: Bernard “Bernie” Sanders

<CD>

6. The Supreme Court's ruling in *Griggs v. Duke Power Company* resulted in this trait being measured by the “disparate impact test.” A study by Kenneth and Mamie Clark found that children who differed in this trait generally preferred the same doll. In the case (*) *Bakke v. the Regents of the University of California*, the Supreme Court banned the use of quotas measuring this trait in college admissions while upholding affirmative action. For 10 points, name these social constructs that divide groups of people based on ancestry and skin color, such as Caucasian or black people.

ANSWER: race [accept skin color until mentioned]

<CD>

7. An artist from this country layered a white square on an off-white background in a painting from this country’s Suprematist movement. An obscene letter to the sultan Mehmed IV is being drafted by members of the Zaporozhian host in a painting by an artist from this country. A painter born in this country painted many *Compositions* and *Improvisations* and was a co-founder of the (*) “Blue Rider” movement. For 10 points, name this home of Kazimir Malevich, Wassily Kandinsky, and Ilya Repin, the last of whom painted *Barge Haulers on the Volga*.

ANSWER: Russia [accept USSR or Soviet Union]

<KS>

8. The integral of curvature with respect to area equals this constant times the Euler characteristic, according to the Gauss-Bonnet theorem. The square root of this constant is multiplied by the standard deviation in the denominator of the probability density function for the normal distribution. The surface area of a (*) hemisphere equals this constant times the radius squared. The period of the function “sine of Bx” equals B divided by this constant, which is symbolized tau. For 10 points, name this constant, which can be found by dividing the circumference of a circle by its radius and is approximately equal to 6.28.

ANSWER: 2 pi [accept tau before mention]

<SAM>

9. In a story by this author, Michael insists on fencing off the title “Dead Men’s Path” to appease the Government Education Officer. In his essay “An Image of Africa,” this author claimed that Joseph Conrad did not understand the racism on which imperialism “sharpened its iron tooth.” In this author’s most famous novel, the protagonist accidentally kills (*) Ezeudu’s son at a funeral, prompting his family’s exile from Umuofia. In that novel by this author, the protagonist’s son Nwoye adopts the name Isaac. For 10 points, name this author who wrote about the Okwonko family in the novel *Things Fall Apart*.

ANSWER: Chinua Achebe [or Albert Chinualumogu Achebe]

<AB>

10. This man repeated, “Tell ‘em we don’t die, we multiply” in an untitled song he premiered on *The Colbert Report*. In one of this man’s albums, Maya Angelou voices a religious neighbor who leads a prayer that begins, “Lord God, I come to you as sinner.” This man asked, “Why did I weep when Trayvon Martin was in the street?” in the song “The (*) Blacker the Berry.” This man sang that he was the “realest negus alive” in the album version of a song in which he sings, “The world is a ghetto with big guns and picket signs.” For 10 points, name this rapper whose song “i” appears in his album *To Pimp a Butterfly*.

ANSWER: Kendrick Lamar Duckworth [accept either underlined portion]

<SAM>

11. Minority carriers can produce the “diffusion” type of this quantity in a semiconductor. The closed loop integral of the H field equals the enclosed “free” type of this quantity. The magnetic moment of a loop equals this quantity times area. The inductance of an inductor can be found by dividing the magnetic flux by this quantity. This quantity divided by area equals conductivity times the electric field in the original formulation of (*) Ohm’s law, which also sets this quantity equal to voltage over resistance. For 10 points, name this quantity that is measured in amperes.

ANSWER: electric current [prompt on “I”]

<SAM>

12. An early member of this house named Owen Meredith had a father who took part in Owen Glendower’s rebellion. The first king from this house established the Court of the Star Chamber to try nobles. That king from this house strengthened his claim to the throne by marrying Elizabeth of York. A king of this dynasty was served by (*) Thomas Cranmer and Thomas More, and used the first Act of Supremacy to annul his first marriage. That king from this house also executed his second wife, Anne Boleyn. For 10 points, name this royal house of England that gained the throne after the Wars of the Roses and included Henry VIII.

ANSWER: House of Tudor [or Tudor dynasty]

<AB>

13. A novel by this author ends with forces from Rendang invading the title *Island* while Will Farnaby hears a bird shouting “Attention.” Walter Bidlake impregnates his secretary in a novel by this author, who detailed his first mescaline trip in *The Doors of Perception*. A character created by this author of *Point Counter Point* secludes himself in a lighthouse, where he whips himself until (*) Lenina Crowne comes to visit him. In that novel by this author, the consumption of soma is used by World Controllers like Mustapha Mond to keep the World State placated. For 10 points, name this author of the dystopian novel *Brave New World*.

ANSWER: Aldous Leonard Huxley

<AB>

14. The kinetic energy of each degree of freedom is proportional to this variable, according to the equipartition theorem. The root mean squared velocity of a fixed number of gas particles is proportional to the square root of this quantity. The entropy of vaporization is defined as the (*) heat of vaporization divided by this quantity. Gay-Lussac discovered that all else equal, increasing this quantity will also increase the pressure of a gas. For 10 points, name this quantity that measures the average kinetic energy of a substance and can be measured in degrees Celsius.

ANSWER: temperature [prompt on “T”]

<SAM>

15. This ruler forced the end of the War of the Bavarian Succession by threatening to invade. The Dniester was established as a border in the Treaty of Jassy during this ruler’s reign. This ruler created the First League of Armed Neutrality to combat British sea power. An advisor of this ruler engineered the coup that overthrew this ruler’s predecessor, Peter III. Grigory (*) Orlov advised this ruler until his enemies at court accused him of seducing his cousin. Another advisor to this ruler built fake villages in Ukraine to impress her and was named Grigory Potemkin. For 10 points, name this “enlightened despot” and Empress of Russia.

ANSWER: Catherine the Great [or Catherine II]

<AB>

16. A novel by this author ends with a mob coming to evict Neil Kingsblood for his black ancestry. Another novel by this author ends with the title character congratulating his son Ted for eloping with Eunice. Senator Trowbridge opposes Buzz Windrip’s fascist regime in a novel by this author titled *It Can’t Happen Here*. A

character created by this author eventually gives up his relations with Seneca Doane and his affair with Tanis Judique before joining the (*) Good Citizen's League. In that novel by this author, Paul Riesling is arrested for shooting his wife Zilla. For 10 points, name this author of *Babbitt*.

ANSWER: Sinclair Lewis

<AB>

17. The first step of this process features a zygotene stage during which the synapto-nemal complex is assembled. Genetic diversity is increased during this process when homologous recombination occurs during crossover. In human females, this process results in the creation of three (*) polar bodies due to unequal cytoplasmic division. Nondisjunctions are errors in this process that can lead to trisomies, such as Down syndrome, because the chromosomes in sperm or egg cells were divided unevenly. For 10 points, name this process of cell division, which, unlike mitosis, results in four haploid cells.

ANSWER: meiosis [do not accept or prompt on "mitosis"]

<BZ>

18. In this book of the bible, God instructs the title character to "Gird up now thy loins like a man" before asking "Where wast thou when I laid the foundations of the earth?" and "Canst thou draw out leviathan with an hook?" In this book of the Bible, Elihu enters a conversation unannounced after a discussion involving (*) Eliphaz, Bildad, and Zophar. The title character of this book declares, "Naked I came from my mother's womb, and naked shall I depart" after he loses his flocks and children and is struck with boils. For 10 points, name this book of the Bible in which Satan holds a contest with God regarding the title "perfect and upright" man.

ANSWER: Job

<CD>

19. During an attempt to acquire some of these animals, the two-headed dog Orthrus and his master Eurytion were killed. The Roman monster Cacus attempted to hide his theft of some of these animals by dragging them backwards by their tails. Theseus killed one of these animals on the plains of Marathon, and that animal had earlier fathered Asterion while copulating with (*) Pasiphae on the island of Crete. The practice of sending fourteen Athenian youths and maidens to feed a monster with the head of this creature ended after a hero killed that monster with the help of Ariadne. For 10 points, name this animal whose head was possessed by the Minotaur.

ANSWER: cattle of Geryon [or bulls; or cows]

<BZ>

20. Many of these objects are shown along the center of a Song dynasty scroll depicting the Qingming Festival. One type of these objects was used against the forces of Toyotomi Hideyoshi during his invasion of Korea and was given a nickname that referred to how its defensive covering resembled a turtle. One of these objects carried a (*) giraffe from Malindi back to the imperial court of China. During Kublai Khan's invasion of Japan, many of these objects redirected by kamikaze winds. For 10 points, name these objects exemplified by the junks commanded by Zheng He on his expeditions.

ANSWER: ships [or boats, accept specific types of ships mentioned in the tossup]

<EX>

Bonuses

1. Bonus: This text says that drinking *soma* will bring immortality. For 10 points each:

[10] Name this text, which explains that the four social varnas originated from the body parts of Purusha. This text is the oldest surviving written text in any Indo-European language.

ANSWER: **Rigveda** [prompt on “Vedas”]

[10] This religion, which divides society into the four varnas, believes that all of existence contains the god-force Brahman, and that our souls, or atman, should seek moksha to be liberated from rebirth. Shiva is one of its gods.

ANSWER: **Hinduism**

[10] This is the most prestigious varna, representing the priestly class. In the Purusha story of the *Rigveda*, members of this class emerge from his head.

ANSWER: **Brahmins**

<CD>

2. Bonus: Answer the following about a bacterial transformation you might perform, for 10 points each:

[10] A common high school biology experiment involves transforming *E. coli* with pGLO, which is one of these small circular segments of DNA often found in bacteria.

ANSWER: **plasmids**

[10] Successfully transforming *E. coli* with the pGLO plasmid will cause them to fluoresce this color under ultraviolet light. In plants, this color is reflected by the chlorophyll pigment.

ANSWER: **green**

[10] Another part of the pGLO plasmid codes for an enzyme that degrades these kinds of antibiotics, examples of which include ampicillin and penicillin. These antibiotics disrupt the formation of a peptidoglycan cell wall.

ANSWER: **beta-lactam** antibiotics [accept **beta-lactamase**]

<BZ>

3. Bonus: The British response to this revolt began with the trial of the Kapenguria Six. For 10 points each:

[10] Name this Kikuyu revolt that was quelled with the villagisation campaign and the Swynnerton Plan.

ANSWER: **Mau Mau** Uprising

[10] The Mau Mau Uprising took place in this British colony that gained independence in 1963. This country fought the Shifta War with its northern neighbor, Somalia, and contains a UN office in its city of Nairobi.

ANSWER: Republic of **Kenya**

[10] This member of the Kapenguria Six was the first president of an independent Kenya. This man, whose last name can be translated as “the light of Kenya,” was succeeded by Daniel arap Moi.

ANSWER: Jomo **Kenyatta**

<AB>

4. Bonus: Answer the following about various nested things in mythology, for 10 points each:

[10] According to the *Popol Vuh*, the Hero Twins were invited to this Mayan underworld via a message relayed by a louse hidden in a toad that was hidden in a snake that was itself hidden in a falcon.

ANSWER: **Xibalba**

[10] In Slavic myth, the soul of Koschei the Deathless was hidden in a needle that was located in one of these objects buried in a chest. In Greek myth, Castor and Polydeuces were hatched from these objects laid by Leda.

ANSWER: **egg** [Koschei’s soul was in a needle in an egg in a hare in a duck in a chest under a tree]

[10] The magic book of this Egyptian god was said to be hidden within several boxes made of different materials like iron, juniper, and gold. The curved beak of this ibis-headed god was taken to represent the Moon.

ANSWER: **Thoth** [or **Djeheuty**]

<BZ>

5. Bonus: This man used an insect as a metaphor for sex in his poem “The Flea.” For 10 points each:

[10] Name this author of the *Holy Sonnets*. This metaphysical poet also wrote a poem ending with the line “Nor ever chaste, except you ravish me,” titled “Batter my heart, three person’d god.”

ANSWER: John Donne

[10] Donne’s tenth Holy Sonnet says that this thing is “slave to fate, chance, kings, and desperate men” and that “poppy or charms can make us sleep...better than thy stroke.” The title of that poem warns it to “be not proud.”

ANSWER: death

[10] A Donne sermon provided the title of this man’s novel *Set This House on Fire*. Thomas Gray prosecutes the title character in his book *The Confessions of Nat Turner*.

ANSWER: William Styron

<AB>

6. Bonus: Mersenne names a group of these numbers that are one less than a power of two. For 10 points each:

[10] Name these numbers whose only positive divisors are one and themselves.

ANSWER” prime numbers

[10] This term describes two prime numbers that differ by two, such as 5 and 7 or 11 and 13. These numbers’ namesake conjecture states that there are infinitely many of them.

ANSWER: twin primes

[10] According to the prime number theorem, the average distance between prime numbers among the first N integers is this function of N.

ANSWER: log(N) [or natural logarithm of N; or ln(N)]

<SAM>

7. Bonus: He kept himself in power and suppressed opposition with the Sigurimi police force. For 10 points each:

[10] Name this Albanian communist leader, who led Albania through a period of industrialization in the latter half of the twentieth century.

ANSWER: Enver Halil Hoxhaj [“hodgah”]

[10] This man was, according to Enver Hoxha, the last truly Communist leader of the Soviet Union. This man led the Soviet Union during World War II and was notorious for his numerous purges of political opponents.

ANSWER: Joseph Stalin [or Ioseb Besarionis dze Jughashvili]

[10] Enver Hoxha instituted this religious policy in Albania, making it the first country to officially adopt it. The United States modified the Pledge of Allegiance in 1954 to emphasize that it did not condone this belief.

ANSWER: atheism [accept word forms]

<AB>

8. Bonus: One of them in Jerusalem’s Old City is named for Damascus. For 10 points each:

[10] Name these structures, one of which was designed by Auguste Rodin and depicts various scenes in hell.

Rodin’s sculpture *The Kiss* was originally found in one of these structures.

ANSWER: gates

[10] This sculpture by Rodin was accused of being cast from a live model and depicts a nude male standing on one leg while looking away to the side.

ANSWER: *The Age of Bronze* [or *L’Âge d’airain*]

[10] This other bronze Rodin sculpture was also found in *The Gates of Hell* and depicts a seated, contemplative man with the back of his hand on his chin.

ANSWER: *The Thinker*

<CD>

9. Bonus: Friend functions are able to access data from one type of these things. For 10 points each:

[10] Name these things that can be public or private and consist of constructors, instance variables, and methods.

ANSWER: classes

[10] Classes are used in object-oriented programming languages such as this language designed by Sun Microsystems which has a namesake virtual machine and was designed with the slogan, “write once, run anywhere”.

ANSWER: Java [do not accept “JavaScript”]

[10] When a method in a class is overridden, this process is used to select the appropriate method for a specific object. In Java, this process takes place during runtime.

ANSWER: polymorphism

<SAM>

10. Bonus: This event was stopped in part due to the efforts of a helicopter rescue crew. For 10 points each:

[10] Name this event, in which hundreds of civilian villagers were killed in a place codenamed Pinkville. William Calley was the only person convicted for his actions during this event.

ANSWER: My Lai [“MEE-LYE”] massacre

[10] The My Lai massacre took place during this war, which ended with the fall of Saigon. Domestic opposition to this war helped tank Lyndon Johnson’s reelection campaign.

ANSWER: Vietnam War

[10] Opposition to the Vietnam War increased after this offensive launched by North Vietnamese forces, which was named after the Vietnamese New Year.

ANSWER: Tet Offensive

<AB>

11. Bonus: Answer the following questions about literary families, for 10 points each:

[10] This author won an Orange Prize for depicting the Belsey family in the novel *On Beauty*. Earlier, she wrote about the Iqbal and Jones families in her first novel, *White Teeth*.

ANSWER: Zadie Smith

[10] This author wrote about Scout and Jem, members of the Finch family, in her novel *To Kill a Mockingbird*.

ANSWER: Harper Lee

[10] The Glass family is featured in this author’s short story collection *Nine Stories*. This author wrote about Seymour Glass’s suicide in “A Perfect Day for Bananafish,” one of the stories in that collection.

ANSWER: J.D. Salinger [or Jerome David Salinger]

<AB>

12. For 10 points each: answer the following about Willard Van Orman Quine:

[10] Quine’s most famous paper attacks the analytic-synthetic distinction and reductionism, which he says are the “Two Dogmas of” this philosophy. This philosophy states that knowledge can only come from experience

ANSWER: empiricism [accept word forms]

[10] According to the Duhem-Quine thesis, testing these statements requires auxiliary assumptions. In the scientific method, these statements are tested in experiments and can be given in an if/then format.

ANSWER: hypothesis

[10] Quine formulated a system for this field called the New Foundations. Ernst Zermelo and Abraham Fraenkel developed one of several axiomatic systems for this field, and a paradox in this field is named for Bertrand Russell.

ANSWER: set theory

<SAM>

13. Bonus: The pairing of electrons in these materials is described by BCS theory. For 10 points each:

[10] Name these materials that expel magnetic field lines in the Meissner effect. These materials are named for the fact that they have near-zero electrical resistance when sufficiently cooled.

ANSWER: superconductors

[10] YBCO was the first superconductor discovered that has a higher critical temperature than the temperature of this common cryogenic fluid that boils at 77 kelvin.

ANSWER: liquid **nitrogen** [accept liquid **N₂**]

[10] A theory describing superconductors is named for Vitaly Ginzburg and this scientist. This scientist wrote a series of textbooks on theoretical physics with his student Evgeny Lifshitz.

ANSWER: Lev Davidovich **Landau**

<SAM>

14. Bonus: This town's rats all begin to die at the beginning of a book in which The Prefect makes the decision to quarantine it. For 10 points each:

[10] Name this Algerian town, which is closed at the suggestion of Dr. Rieux.

ANSWER: **Oran**

[10] Oran is quarantined in this novel, in which Dr. Rieux attempts to combat the title phenomenon, which may or may not have killed a priest named Father Paneloux.

ANSWER: *The* **Plague** [or *La* **Peste**]

[10] *The Plague* is by this French Algerian author, who also wrote about Mersault's trial and execution in *The Stranger*.

ANSWER: Albert **Camus**

<AB>

15. Bonus: This national park is populated by many tall rock spires known as *hoodoos*. For 10 points each:

[10] Name this national park that contains many natural amphitheaters eroded into the side of the Paunsaugunt Plateau. According to the Paiute Indians, this park's rocks were once people whom Coyote turned to stone.

ANSWER: **Bryce Canyon** National Park

[10] Bryce Canyon National Park and the nearby Zion National Park are both located in this state, which is also home to rock formations like Delicate Arch and the northern part of Monument Valley.

ANSWER: **Utah**

[10] This largest city in Utah is home to the headquarters of the Mormon Church.

ANSWER: **Salt Lake City**

<JD>

16. Bonus: Answer the following about molecular orbitals, for 10 points each:

[10] Molecular orbital theory explains why the liquid phase of this element is paramagnetic. This element is consumed, along with glucose, during cellular respiration, and makes up about 20% of the Earth's atmosphere.

ANSWER: **oxygen**

[10] An asterisk denotes these types of molecular orbitals, which are higher in energy than bonding molecular orbitals. There must be more electrons in bonding molecular orbitals than in these in order for a bond to exist.

ANSWER: **antibonding** molecular orbitals

[10] Diatomic nitrogen has six more electrons in bonding orbitals than in antibonding orbitals, so its bond order is this number. Alkynes and diatomic nitrogen have this many bonds between carbons and nitrogens, respectively.

ANSWER: **three**

<BZ>

17. Bonus: Nicholas Reeves claims that Smenkhkare is actually this person ruling as Pharaoh. For 10 points each:

[10] Name this Egyptian queen who outlived her husband Akhenaten, leading to theories of her ruling in her own right.

ANSWER: **Nefertiti**

[10] Nefertiti fathered this “boy king,” whose tomb was excavated by Howard Carter. Due to generations of inbreeding, this teenage pharaoh suffered from a club foot, sickle cell anemia, and scoliosis.

ANSWER: King Tutankhamun

[10] Tutankhamun restored the worship of Amun after his father had promulgated the worship of Aten, which represented this object.

ANSWER: the Sun [or solar disc]

<AB>

18. Bonus: This film shows the aftermath of David Miranda's visit with Laura Poitras. For 10 points each:

[10] Name this winner of the 2015 Academy Award for Best Documentary, the bulk of which shows the title figure being interrogated about the XKEYSCORE and PRISM data-collection programs.

ANSWER: Citizenfour

[10] This man, who used the code name “Citizenfour,” is the ex-contractor with the NSA who leaks the information about XKEYSCORE and PRISM. He flees to Moscow and is followed there by his girlfriend at the end of the film.

ANSWER: Edward Snowden

[10] This British newspaper was the first one to bring the Snowden leaks to public view. Glenn Greenwald's work with this newspaper helped it earn the 2014 Pulitzer Prize for Public Service.

ANSWER: *The* Guardian

<CD>

19. Bonus: This interval, along with perfect fourths and perfect fifths, is generally avoided in parallel motion when part-writing. For 10 points each:

[10] Name this interval that spans from an A up to the next A. It is named because there are 8 scale degrees between those notes in a major or minor scale.

ANSWER: octave

[10] There are this many actual tones in an octave if you count all the notes in a chromatic scale. Serialist music requires all of these tones be played in a row before any of them are replayed.

ANSWER: 12

[10] This composer developed serialism as an outgrowth of his creation of atonal music, which he taught to his students Alban Berg and Anton von Webern.

ANSWER: Arnold Schoenberg

<CD>

20. Bonus: This author included “Wunderkind” in *The Ballad of the Sad Cafe*. For 10 points each:

[10] Name this author, whose novel *The Member of the Wedding* follows the tomboy Frankie Addams. A more famous novel by this author features the deaf-mute John Singer.

ANSWER: Carson McCullers

[10] This author called *Clock Without Hands*, a McCullers novel, “the worst book I have ever read.” The Misfit murders the Grandmother in her story “A Good Man is Hard to Find.”

ANSWER: Flannery O'Connor

[10] McCullers and O'Connor were both female members of this literary tradition, which uses slightly disturbing or sinister elements in works that are set in the namesake part of the United States.

ANSWER: Southern Gothic

<AB>
