

MKULTRA II: A Fucking Didactic Educational .docx File

The Milton Keynes Ultimate Liaison of Trash and Academia

Edited by Emma Laslett, Ian Bayley, Hugh Bennett, Tristram Cole, Edmund Dickinson, Jonathan Elliott, David Knapp, David Stainer and Christopher Stern

Round 1 - Packet by Old London Town (Andrew Frazer, Brian Wright, Max Espensen, Sam Goodyear and Mike McKenna)

Tossups

1. Inclusions of an oxide of this element create asterisms in star sapphires and rubies. This is the lightest element to be extracted from its ore in a process of heating with chlorine and carbon; that is the Kroll Process. The isopropoxide of this element is used in the enantioselective epoxidation of allylic alcohols, and chlorides of this element are used in the reductive coupling of two carbonyl groups in the (*)

McMurry reaction. For most heterogeneous Ziegler-Natta catalysts, the key step in polymerisation is alkene insertion into a bond between carbon and this element. Ilmenite and rutile are among the ores of this element whose +4 oxidation state dioxide is a white pigment used in sunscreen. For 10 points, name this first-row transition metal symbolised Ti.

ANSWER: titanium (accept Ti until mentioned)

2. The second movement allegretto of a symphony of this number opens and closes with a second inversion A minor chord and this is the total number of books in Messiaen's *Catalogue d'Oiseaux*. A pastiche of *Da geh' ich zu Maxim*, from Frank Lehar's (*) *Merry Wives of Windsor* is used as a 22 bar ostinato in an Allegretto first movement march in one symphony of this number. In another symphony of this number by Mahler, a mandolin and guitar are unusually present in the score of the fourth movement C major Rondo-finale. Beethoven's symphony of this number was called "the apotheosis of the dance" and Shostakovich's is known as the Leningrad symphony. For 10 points, give the number of symphonies composed by Prokofiev and Sibelius.

ANSWER: Seven

3. In his YouTube video *Mickey Minaj*, Todrick Hall drinks from the head of Buzz Lightyear while dressed as one of these creatures. In *The Legend of Zelda: Link's Awakening*, you are asked to retrieve the necklace of one of these creatures, named Martha. At the end of the Pixar short *Knick Knack*, the eponymous snowman sees a souvenir of one of these creatures 'from sunny (*) Atlantis'. In the *Futurama* episode 'The Deep South', one of these creatures explains to Fry how their species have sex, causing him to run away screaming. In *Sabrina Down Under*, the Teenage Witch travels to Australia to help protect a colony of these creatures threatened by water pollution. For 10 points, name these mythical aquatic creatures, portrayed by Daryl Hannah in *Splash*.

Answer: Mermaids [accept merpeople]

4. One work in this series became infamous for one of its endings, featuring a main antagonist apparently throwing himself off a cliff screaming "I'm so gay!". One instalment in this video game franchise features three former characters amalgamated into 'Triborg'. Primary antagonists in various editions of this franchise include Kotal Kahn and (*) Shinnok, and subtitles of its releases include *Deception* and *Deadly Alliance*. Stealing the opponent's soul and ripping out their spine are two examples of the gory finishing moves, known as fatalities, for which this franchise is infamous. Featuring the characters Liu Kang, Sonya Blade, and Sub-Zero, for 10 points, this is which fighting game franchise, notable for its habit of replacing the letter C at the start of words with K?

ANSWER: Mortal Kombat [accept specific games in the series]

5. This artist included a poem by Baudelaire in the right margin of a painting in which a man in the foreground is dwarfed by a table with a vase of flowers and a female nude. In one work by this artist, named after a ruined Indian city, a group of similar men are depicted in a rhombic grid. A red bird is

clutched by a disembodied hand in another work by this artist, which features a ship on a stormy sea in the background. This artist of *The Difficult Crossing* painted an (*) eye into a slice of ham in *The Portrait*, and clouds in the shape of a tuba and torso in *Threatening Weather*. This artist's painting *Golconda* shows bowler-hatted men suspended in midair. For 10 points, name this Belgian artist who proclaimed "Ceci n'est pas une pipe" in *The Treachery of Images*?

ANSWER: René-(François-Ghislain) Magritte

6. One novella by this author is about three men who ride subway trains and bring themselves to orgasm by rubbing against women, which is often paired with one about a 17 year old compulsive masturbator. Another novella by this author is narrated by a man who repeatedly sings 'Happy Days are here again' and believes he is dying from liver cancer. In one novel by this author the protagonists become sexually excited by the smell of animal corpses that have died from (*) bubonic plague. In that novel by this author a group of reformatory boys are abandoned in a village and taught to hunt birds by a deserter from the Korean army. Another novel by this author of *The Day He Himself Shall Wipe Our Tears Away* is about a man who commits incest with his mentally handicapped sister causing her to commit suicide, and features a character who paints his head red and sticks a cucumber in his anus before hanging himself. For 10 points name this author of *Nip the Buds, Shoot the Kids* and *The Silent Cry*.

ANSWER: Kenzaburō Ōe

7. A major landform of this mountain range is the Sanetti Plateau and the spa town of Ambo is located in this mountain range. The mountain nyala is an endangered antelope found only in this mountain range, the southern areas of which were formerly controlled by the Kingdom of Kaffa. Sub-ranges in this mountain range include the Semien Mountains and the Bale Mountains, and the ancient capitals of (*) Axum and Gondar are situated in this mountain range. In this mountain range is situated Lake Tana, the source of the Blue Nile, and the northern part of this mountain range is located in southern Eritrea. Sometimes referred to as the "Roof of Africa", for ten points, name this large mountain range named for a country with capital Addis Ababa.

ANSWER: Ethiopian Highlands

8. This man was the 6th Solicitor General of the United States, and the only holder of that office to become President. As the first civilian Governor of the Philippines under US rule, this man clashed with the military Governor-General Arthur MacArthur. The Ballinger-Pinchot affair marred the Presidency of this man whose Vice-President, James (*) Sherman, was the last to die in office. This man won election by inflicting a third defeat on William Jennings Bryan, but his re-election was scuppered when his predecessor stood against him for the Bull Moose party. Theodore Roosevelt thus enabled Woodrow Wilson to defeat, for 10 points, which US President, who uniquely later became Chief Justice?

ANSWER: William Howard Taft

9. This man criticised sloppy use of defined terms by rival thinkers in *Definitions in Political Economy*. This man was credited by Marx with the idea behind Lassalle's "iron law of wages" and sought to rebut Say's Law in his debates with David Ricardo. This man supported the Poor Laws in his pamphlet *The Crisis* but later argued that they limited the mobility of the poor in a work which argued that the means of (*) subsistence increase only arithmetically while the title concept increases geometrically. The point at which food supply becomes inadequate to feed the human race is, for 10 points, a catastrophe named after which pessimistic economist and author of *Essay on the Principle of Population*?

ANSWER: Thomas (Robert) Malthus

10. This figure is portrayed by Rex Ingram in the 1936 film *The Greener Pastures*, and by Ferdy Mayne in 1985's *A Night Train to Terror*. In the film adaptation of Irvine Welsh's *The Acid House*, Maurice Roëves controversially portrays this figure as beer-swilling and foul-mouthed. Whoopi Goldberg has portrayed this figure in two unrelated films, aiding characters played by Kate Hudson and Kermit the Frog. In (*) *Dogma*, Ben Affleck's head explodes when Alanis Morissette, portraying this figure, speaks to him. Graham

Chapman voices this figure in one film, and plays a character mistaken for his son in another. For 10 points, name this notable religious figure, portrayed by Morgan Freeman in *Bruce Almighty*.

ANSWER: **God** [accept reasonable clear-knowledge alternatives, but do not accept or prompt on 'Jesus' or 'Christ']

11. **Spider Robinson claims that he lost his 'literary virginity' to this author. In this author's longest novel, his recurring character commits incest with his mother before leaving to fight in World War 1. That character by this author befriends the mathematician 'Slipstick' Libby and was first introduced in *Methuselah's Children*. Another novel by this author features the one-armed (*) technician Mannie, and a self-aware supercomputer he has nicknamed 'Mike'. This creator of Lazarus Long popularised the phrase "there ain't no such thing as a free lunch" in his novel *The Moon is a Harsh Mistress*, and wrote about giant Bugs in *Starship Troopers*. This author created the word 'grok' in a novel about the Martian Valentine Michael Smith. For 10 points name this author of *Stranger in a Strange Land*.**

ANSWER: Robert Anson **Heinlein**

12. **Part of this period saw retired emperors exercise a 'cloistered rule' called *insei*. The *Mayfly Diary* and the *Pillow Book* were written during this period. The final years of this period saw the Taira in power, although most of it was dominated by the Fujiwara clan. This period, which saw the Hōgen and Heiji rebellions, began when (*) Kanmu moved the capital to Kyoto from Nara. Minamoto Yoritomo, winner of the Genpei war that ended this period, became the first shogun. A flowering of art and literature that saw Lady Murasaki write the *Tales of Genji* occurred, for 10 points, during which period of classical Japanese history that ran from 794 until 1185, when the Kamakura shogunate was established?**

ANSWER: **Heian** period

13. **In a work whose title describes a "Dynamic" approach to this field, Lester F. Ward attacked the laissez-faire approach of William Sumner. The interpretative or participatory approach to this subject was pioneered by Georg Simmel. Randall Collins identified four theoretical traditions in this discipline, including (*) symbolic interactionism, founded by Charles Cooley and George Mead, and structural functionalism, whose proponents include Robert K. Merton and Talcott Parsons. Other practitioners of this discipline have included Émile Durkheim and Max Weber. Founded by the positivist Auguste Comte, for 10 points, name this study of the origin, organisation and development of human societies.**

ANSWER: **Sociology**

14. **At the age of 25, this scientist won the Adams Prize for a work in which he developed ideas of Helmholtz and Kelvin by providing mathematical descriptions of the motion of vortex rings. With Francis Aston, this physicist observed two distinct deflection parabolas in a stream of neon atoms, providing evidence for Frederick Soddy's theory of (*) isotopes and pioneering the use of mass spectrometry. This physicist's observation that cathode rays could travel much further through air than expected led to his most significant discovery, that of entities he called corpuscles, after which this scientist proposed a model based on the assumption that positive charge is evenly distributed through an atom, like raisins in a plum pudding. For 10 points, which scientist was awarded the 1906 Nobel Prize in Physics for his discovery of the electron?**

ANSWER: **J**(oseph) **J**(ohn) **Thomson** [prompt on "Thomson"; do not accept William Thomson, Baron Kelvin]

15. **RabGGTase catalyses the attachment of geranylgeranyl groups to residues of this amino acid. It's not histidine, but the gag knuckle protein fold found in some HIV proteins is characterised by two residues of this amino acid. In peptide mapping, iodoacetamide is used to chemically modify the residue of this amino acid by covalently adding a carbamidomethyl group to it. The high abundance of this amino acid accounts for the rigidity of (*) keratin. The tertiary structure of proteins is supported by the disulfide bonds that typically occur between residues of this amino acid. For 10 points, name this sulphur-containing amino acid represented by the single letter 'C'.**

ANSWER: **Cysteine** [or **Cys**; or **C** before it is read]

16. Hosea 14 implores Israel to ask the Lord to “receive us graciously; so we will render [these animals] of our lips”, while according to Psalm 29, the Lord “maketh them also to skip like” one of these animals. 1 Kings describes Jeroboam sending two idols in the form of these animals to Dan and Bethel, while Jeremiah 34 mentions cutting one “in twain” in reference to the common use of these (*) young animals in sacrifices. In Exodus, to meet the Israelites’ demand for “gods to go before them”, Aaron makes an idol of one of these animals out of gold. For 10 points, in the Gospel of Luke, Jesus tells of the prodigal son’s father killing a ‘fatted’ example of which young animal to celebrate his return?

ANSWER: Calf [prompt on ‘bullock’, prompt on ‘cow/cattle’ before ‘young’]

17. One holder of this title signed the Treaty of Berwick with the Lords of the Congregation, while another died leading the king’s vanguard at Bosworth. This title was first granted to Thomas Mowbray, while the Earl of Surrey was given it for his victory at Flodden. One holder of this title pardoned the Pilgrimage of Grace rebels, presented the Six Articles to parliament, and saw two of his nieces (*) marry Henry VIII. Another was imprisoned for scheming to marry Mary Queen of Scots in 1569 and later executed. The holder of this title, currently Edward Fitzalan-Howard, is also Earl Marshal. For 10 points, this is which noble title named for the county centred on Norwich.

ANSWER: Duke of Norfolk (allow Earl of Surrey before ‘Bosworth’, allow Earl Marshal or Baron Mowbray before ‘Thomas Mowbray’ who was not the first to be these)

18. One artist from this country performed *Gollum’s Song* for the closing credits of *The Two Towers*, while another group from this country recorded albums such as *Life’s Too Good* and *Here Today, Tomorrow Next Week!* Another artist from this country collaborated with his partner Alex Somers for the album *Riceboy Sleeps*, and first recorded English vocals for his solo album (*) *Go*. That artist is also the frontman of a band from this country, and is known for his falsetto vocals, often in an invented language, and playing guitar with a cello bow. That band released albums such as *Von*, *Valtari* and *Takk...*, and singles such as *Svefn-g-englar*, *Glosóli* and *Hoppípolla*. The home of Sigur Rós and The Sugarcubes, for 10 points, name this country, whose most successful musical export is Björk.

ANSWER: Iceland

19. Anthony Burgess’ novel *Abba Abba* is about the last months in the life of this author. This author wrote that “a bowery nook / Will be elysium” in a poem that mocks the Augustan couplet as a ‘rocking-horse’, and praises the French critic Boileau. Another poem by this author opens with a beadsman praying in the cold and ends with the death of Angela. This author of (*) *Sleep and Poetry*, wrote a poem about a woman in an elfin grot who “looked at me as she did love / And made sweet moan.” That poem by this author ends with a knight who “awoke and found me here / On the cold hill’s side.” This author who wrote about Porphyro spying on the sleeping Madeline in *The Eve of St Agnes* claimed “A thing of beauty is a joy forever” and that “Beauty is truth, truth Beauty”. For 10 points name this author of *La Belle Dame Sans Merci*, *Endymion* and *Ode on a Grecian Urn*.

ANSWER: John Keats

20. One man with this surname won a silver medal in Downhill at the 1996 Mountain Bike World Championships and won three consecutive gold medals in Boardercross at the Winter X Games in the late ‘90s. A Formula 1 driver with this surname drove for the Zakspeed and Tyrrell teams in the 1980s and his son (*) Jolyon currently races for the Renault F1 team. Graham Taylor gave a combative Sheffield Wednesday midfielder with this surname all 18 of his England caps; his first name is Carlton. Another man with this surname won seven majors in golf in the late 1950s and early ‘60s. For 10 points, what is the surname of the American golfer nicknamed The King and whose first name is Arnold?

ANSWER: Palmer (accept Shaun Palmer, Jonathan Palmer, Jolyon Palmer, Carlton Palmer and Arnold Palmer)

Bonuses

1. Answer three questions about animated TV animals for 10 points each.

[10] Magica de Spell and Flintheart Glomgold are the main antagonists of this late 80's animated series, opposed by the protagonist and his grandnephews Huey, Dewey and Louie.

ANSWER: **DuckTales**

[10] This major character in *American Dad!* was formerly an East German ski jumper until the CIA transplanted his brain into a goldfish at the 1986 Winter Olympics.

ANSWER: **Klaus** Heissler

[10] Along with Finn the Human, this shape-changing dog is one of the central characters of *Adventure Time*.

ANSWER: **Jake** the Dog

2. Examples of art in this form include the *Portinari Altarpiece* by Hugo van der Goes. For 10 points each:

[10] Name this type of panelled painting construction, also used for Hieronymus Bosch's *The Garden of Earthly Delights*.

ANSWER: **triptych**(s) (accept **three-panelled** paintings; prompt on "polyptych"; do not accept or prompt on "diptych")

[10] This Early Netherlandish artist created the *Mérode Altarpiece*, in which the annunciation is shown in a domestic scene in the central panel, with Saint Joseph working as a carpenter on the right in front of a window opened to a busy town.

ANSWER: Robert **Campin**

[10] This British artist created the triptych *Three Studies for Figures at the Base of a Crucifixion*, as well as painting a series of *Black Triptychs* to exorcise his grief over the suicide of his lover and muse, George Dyer.

ANSWER: Francis **Bacon**

3. Answer some questions about 'entertainments' partially set in 'Greenland' For 10 points each:

[10] Journalist Fred Hale is in town pretending to be Kolley Kibber when he is murdered by teenage gangster Pinkie Brown in this Graham Greene novel.

ANSWER: **Brighton Rock**

[10] In "The Ministry of Fear" Arthur Rowe is mistaken for a spy by a fortune teller who gives him the information needed to correctly perform this action.

Answer: **Guess the weight of a cake** (accept logical equivalents)

[10] The last of his novels that Greene called an 'entertainment' was this one in which Captain Segura passes out drunk after using miniature bottles of Scotch and Bourbon to play draughts.

ANSWER: **Our Man in Havana**

4. For 10 points each, answer these questions on colour chemistry:

[10] Phenolphthalein is one example of this class of chemicals that change colour at a specific pH, enabling acid-base titrations.

ANSWER: pH **indicator**

[10] The structural or functional part of a molecule responsible for its observed colour is given this name. These structures often absorb in the visible region of the spectrum due to conjugation of delocalised electrons.

ANSWER: **chromophore**(s)

[10] This highly conjugated aldehyde has a chromophore that absorbs at different frequencies depending on the protein to which it is bound in different photopsin pigments, so allowing humans to perceive colour.

ANSWER: **retinal** (or **retinaldehyde** or **retinene** or **Vitamin A aldehyde**; do not accept or prompt on "retinol" or "Vitamin A")

5. This phenomenon was first named by Peter Wason, who viewed it in terms of a rejection of falsificationism. Later, Klayman and Ha explained it in terms of a "positive test strategy". For 10 points each:

[10] Name this tendency to seek out information which agrees with one's preexisting beliefs and screen out information which contradicts them.

ANSWER: **Confirmation bias** (accept **Myside bias**)

[10] Another type of cognitive bias occurs when observers transfer positive (or negative) feelings about one aspect of a person to another unrelated one, for example assuming that an attractive person is also kind and honest.

ANSWER: **Halo** effect (accept **horns** effect or **affect heuristic**)

[10] This doubly eponymous effect describes the tendency for relatively average individuals to overestimate their own ability and for experts to underestimate theirs.

ANSWER: **Dunning-Kruger** effect (do not accept 'imposter syndrome', which applies to the latter half of the question but is not doubly eponymous)

6. Here are some celebrities: Hugh Bonneville. Elton John. Ryan Giggs. With that in mind, have some bonuses on legal terminology. For 10 points each:

[10] This word describes a court order compelling a party to do or refrain from doing certain things. Particular types of these orders include interim, *Mareva*, anti-suit and super.

ANSWER: **Injunctions**

[10] This word describes situations where, by virtue of their position or status, certain persons are immune from normal legal processes, such as being sued for libel or compelled to give evidence.

ANSWER: **Privilege**

[10] This word describes a number of common law doctrines that prevent a party from arguing certain matters in litigation, due to the party's previous actions or an earlier court decision. This can be proprietary, promissory, issue, or by representation of fact.

ANSWER: **Estoppel**

7. The 1966 Trewartha system sought to modify this system because it was considered too broad in the middle latitudes. For 10 points each:

[10] This widely-used climate classification system, first published in 1884 and later updated in collaboration with Rudolf Geiger, is named for its Russian-German deviser.

ANSWER: **Köppen** climate classification

[10] The Köppen climate classification system is primarily based on the empirical relationship between climate and this feature of the ecosystem.

ANSWER: **vegetation**

[10] In the Köppen classification, this description is given to Group C climates such as Mediterranean and Oceanic climates.

ANSWER: **temperate** or **mesothermal**

8. For a classical system at equilibrium temperature T , the average energy of a particle per degree of freedom is equal to this quantity multiplied by T over 2. For 10 points each:

[10] Give this constant that is ubiquitous in statistical mechanics. It is equal to the ideal gas constant divided by Avogadro's number and is usually represented by a lowercase k .

ANSWER: **Boltzmann**'s constant

[10] This law, named for Boltzmann and another scientist, relates the power radiated from a black body to its temperature. Its proportionality constant, sigma, can be expressed in terms of Boltzmann's constant, Planck's constant and the speed of light.

ANSWER: **Stefan-Boltzmann** law

[10] Boltzmann's constant also appears in the right-hand side of the Rayleigh-Jeans law, which can be used to calculate this property of a black body at a given temperature in terms of wavelength or frequency.

ANSWER: **spectral radiance** [prompt on "radiance"]

9. Lewandowski and his wife have sex in a hospital bed while this character turns his back and plays cards. For 10 points each:

[10] Name this character who eventually receives Kemmerich's boots and kills the printer Gerard Duval while stranded in a shell-hole.

ANSWER: **Paul Bäumer** (Accept either).

[10] Paul Bäumer is a character in this novel about the experiences of German soldiers during the First World War by Erich Maria Remarque.

ANSWER: **All Quiet on the Western Front** (Accept **Im Westen Nichts Neues**)

[10] This is the only character from *All Quiet on the Western Front* who appears in its sequel *The Road Back*.

ANSWER: **Tjaden**

10. These glycoproteins constitute most of the gamma globulin fraction of the blood proteins and are grouped into five isotypes. For 10 points each:

[10] Name these Y-shaped proteins secreted by B cells in response to antigens to mark them for destruction.

ANSWER: **antibodies** [or **immunoglobulins**]

[10] This type of antibody is the first to be produced following infection or immunization. It is by far the largest antibody, comprised of five Y-shaped units with ten binding sites, and its main role is complement activation.

ANSWER: **Immunoglobulin M** [or **IgM**]

[10] Name this region of the antibody also known as the antibody binding site. It binds to the epitope of an antigen.

ANSWER: **Paratope**

11. Fans of Bernardo Bertolucci's Oscar-winning film might like to answer these questions about late Imperial China. For 10 points each:

[10] This Empress Dowager, who resisted foreign influence and supported the Self-Strengthening Movement, was the effective ruler of China from 1861 until her death in 1908.

ANSWER: **Cixi/Tzu Hsi**

[10] Chosen by Cixi on her deathbed, this last emperor of the Qing dynasty succeeded to the throne aged 2, and later became nominal 'Chief Executive' of the Japanese puppet state of Manchukuo.

ANSWER: Henry **Puyi/Xuantong** Emperor

[10] This general became the first (non-provisional) President of the Chinese Republic, but made a short-lived attempt to restore the monarchy in 1915. He is thus arguably the true 'Last Emperor'.

ANSWER: **Yuan Shikai/Hongxian** Emperor

12. The term was first used in print by the poet George Galloway (no, not that one), while social reformer Charles Booth said these areas were inhabited by "vicious, semi-criminal" people. For 10 points each:

[10] This colloquial name for London slum areas, typically inhabited by criminals and prostitutes, may derive from the nesting habits of a certain bird or a slang term for to cheat.

ANSWER: **Rookeries**

[10] This rookery, named after a 17th century column near Covent Garden and Soho, was largely demolished when Shaftesbury Avenue was built. Its name survives in a junction where Monmouth, Mercer and Earlham Streets meet Shorts Gardens.

ANSWER: **Seven Dials**

[10] In this novel, Charles Dickens gives a harrowing description of a rookery, based on Seven Dials, called 'Tom-All-Alone's', where Jo sweeps the crossings.

ANSWER: **Bleak House**

13. Not everyone wanted to party like it's 1999, some artists preferred to focus on other years. For 10 points each:

[10] This song by North Carolina group The Connells commemorated two years, with the music video following the high school class of that period. It was a UK Top 20 hit, and reached Number One in Norway and Sweden.

ANSWER: **"74-'75"**

[10] This year is featured in the titles of tracks by Boards of Canada, The Vines and The Stooges, and Bryan Adams was only interested in its summer, although he would have been ten years old at the time.

ANSWER: 1969

[10] The double A-side *Sunrise/2080* was the first single to be released by this Brooklyn-based experimental group, whose biggest hit to date was 'O.N.E.'.

ANSWER: Yasayer

14. Both Kasper and Peter Schmeichel have played in goal for this country's national team. For ten points each:

[10] Name this country that surprisingly won the 1992 UEFA European Football Championships.

ANSWER: Kingdom of Denmark or Kongeriget Danmark

[10] This man considered Denmark's chances of winning the 1992 Championships to be so low, he decided to remain on holiday. In 2012, this man became the first Dane to manage in the Premier League when he took over at Swansea City after Brendan Rodgers left for Liverpool.

ANSWER: Michael Laudrup (prompt on just "Laudrup")

[10] This Danish striker is the only footballer to have scored in European Cup, UEFA Cup and Cup Winners' Cup finals. This man surprisingly signed for Charlton Athletic after successful spells at Borussia Mönchengladbach and Barcelona.

ANSWER: Allan (Rodenkam) Simonsen

15. This influential work of Enlightenment political philosophy was first published anonymously in 1748, and soon placed on the Church's index of prohibited books. For 10 points each:

[10] Name this work which argues that "there is no liberty if the judiciary power be not separated from the legislative and executive".

ANSWER: *De L'Esprit des Lois* / (On) *The Spirit of Laws*

[10] *On The Spirit of Laws* is the *magnum opus* of this French political philosopher, who provided a satirical depiction of contemporary Parisian civilisation in *Persian Letters*.

ANSWER: Charles-Louis de Secondat, Baron de Montesquieu (accept either underlined part)

[10] The "fable of the troglodytes" in the *Persian Letters* depicts a society who choose to live without government with disastrous results, and was inspired by which author of *Leviathan's* ideas on the state of nature?

ANSWER: Thomas Hobbes

16. The War of the Spanish Succession was the first of many 18th century European wars sparked by, and named for, succession crises. For 10 points each:

[10] The 1733 death of Augustus II led to this war of succession in which Russia, Saxony and the Habsburgs supported Augustus's son, while France, Spain and Sardinia backed the rival candidate, a native of the country concerned, who was supported by most of its nobility.

ANSWER: War of the Polish Succession

[10] This war arose when Charles VI died, leaving his hereditary lands to his daughter, Maria Theresa. During this war, Frederick the Great invaded Silesia for the first time.

ANSWER: War of the Austrian Succession

[10] Also known as the Potato War or Plum Fuss, Austria and Prussia skirmished in this much smaller war about the succession to Duke Maximilian III Joseph.

ANSWER: War of the Bavarian Succession

17. This Hungarian composer is arguably as well known for his formidable virtuoso piano technique as his compositions. For 10 points each:

[10] Name this composer of *Liebesträume* [lee-buhs-troy-mer], *Consolations* and *Hungarian Rhapsodies*.

ANSWER: Franz Liszt

[10] This percussion instrument is unusually prominent in the Allegretto vivace third movement of Liszt's Piano Concerto No. 1, which lead to the dour critic Edouard Hanslick to dub it "Liszt's <this instrument> Concerto"?

ANSWER: Triangle

[10] Liszt also composed a series of piano works in this genre, examples of which include *La campanella*, one of six inspired by Paganini and a series of 12 'transcendental' works of this genre.

ANSWER: études (generously accept studies)

18. An important step in the early industrial revolution was the mechanisation of spinning using the water frame. For 10 points each:

[10] This entrepreneur, dubbed ‘The Father of the Industrial Revolution’, funded, patented and is usually credited for the invention of the water frame, though the design was due to two of his employees, Thomas Highs and John Kay. His cotton mill at Cromford in Derbyshire is considered the first modern factory.

ANSWER: Richard Arkwright

[10] A different John Kay patented this invention earlier, in 1733. Designed to allow a single weaver to work on much wider cloths, it enabled the development of machine looms.

ANSWER: Flying shuttle

[10] Water power was superseded by steam after the design of steam engines was radically improved by James Watt and his partner, this entrepreneur and manufacturer who opened his Soho factory in Birmingham in 1766.

ANSWER: Matthew Boulton

19. In Greek myth, Argus had 100 and Polyphemus just one. But how much do you know about eyes in Japanese mythology? For 10 points each:

[10] The siblings Amaterasu and Tsukuyomi were born from Izanagi washing his eyes after returning from the underworld, and personified these two celestial bodies.

ANSWER: the sun and moon

[10] The Shirime is a troublesome spirit that has no eyes on its head, but instead presents an eye on this part of its body to scare and embarrass passers-by.

ANSWER: anus [accept clear-knowledge equivalents]

[10] Another bizarre creature from Japanese folklore is the Kasa-Obake, which also possesses only one eye, as well as one foot and often a long tongue, and is usually represented as one of these common objects.

ANSWER: umbrella [accept parasol or other clear equivalents]

20. This poet hated the Persians, denouncing their fripperies to his ‘slaveboy’, a word that was translated by Thackeray as ‘Lucy’ to avoid the sexual undertones. For 10 points each:

[10] Name this poet whose Odes include the phrases ‘Carpe Diem’ and ‘Dulce et decorum est pro patria mori’.

ANSWER: Horace (Accept Quintus Horatius Flaccus)

[10] This poem by Horace is associated with the phrases ‘in media res’ and ‘even Homer nods’.

ANSWER: Ars Poetica (Accept The Art of Poetry)

[10] Horace’s Ode III, 13 describes the sacrifice of a goat kid to this rural spring.

ANSWER: Fons Bandusiae (Accept translations indicating Bandusian fountain/spring etc)
